Medicinal Preparation.

(*This Invention received Provisional Protection only.*)

PROVISIONAL SPECIFICATION left by Etienne Reoche at the Office of the Commissioners of Patents, with his Petition, on the 30th September 1861.

I, ETIENNE REOCHE, of Rue D'Enghien, Paris, in the Empire of France, Chemist, do hereby declare the nature of the said Invention for "**A NEW MEDICINAL PREPARATION APPLICABLE INTERNALLY FOR RHEUMATISM AND OTHER DISORDERS,**" to be as follows:—

My improved medicinal preparation consists of a medicine to be applied internally, which is beneficial for rheumatism, neuralgia, gout, stomach, chest, & liver complaints, cramps, flatulence, cholera, & to diseases in general contagious or otherwise. I prepare it of the roots of the pomegranate and date trees, to which may or may not be added that of a plant known in France as santorée. These I macerate in brandy or other spirit alone, or it may be in brandy & wine mixed, or in wine alone; I allow the whole to ferment, & then bottle off & keep for use as required.
